Ngõ 1 Thiên Hiền, Quận Nam Từ Liêm, Hà Nội, Việt Nam

I am a Java developer with 2 years of experience, specializing in building applications using Spring Boot. Throughout my career, I have worked on projects related to enterprise management, optimizing business processes and systems. I have experience working with MySQL databases, ensuring system performance and stability. Additionally, I have hands-on experience in DevOps, utilizing Kubernetes (K8s) and Docker for deploying and managing applications in containerized environments, enhancing scalability and flexibility. I am always eager to learn, improve my skills, and contribute to the growth of technology-driven projects.

HỌC VẤN

09/2019 – 12/2024
Engineer of Infomation Technology - Cử nhân
University of Engineering and Technology – VNU

THÔNG TIN CÁ NHÂN

Ngày sinh 11/11/2001
Quốc tịch Việt Nam
Tình trạng hôn nhân Độc thân
Giới tính Nam

KINH NGHIỆM LÀM VIỆC

10/2022 – Hiện tại
FPT Infomation System
Java Developer

PROJECT ERP ADMIN

Contributions:

- Developed backend APIs
 - Maintain and improve old features and develop new features
 - Enhance performance and security
 - Customize function login of Keycloak
 - Develop function control over API access and data permissions.
 - Develop function link account and switch account cross multiple modules
 - Collaborate with tester and other team members to implement SSO login
- TechStack: Spring Boot, KeyCloak, MySQL, Redis, ElasticSearch

PROJECT NOTIFICATION

Contributions:

- Collaborate with BA to analyze requiments and research solutions
- Design database, APIs

NGOẠI NGỮ

Tiếng Anh

KỸ NĂNG

- RabbitMQ
- Linux
- Git
- Elastic Stack
- MySQL Database
- JavaScript
- Apache Kafka
- K8s
- Docker
- Redis
- Spring Boot
- Java

- Manage template, channel, schedule, log and retry message manual

TechStack: Spring Boot, MongoDB, Kafka, Redis, ElasticSearch

PROJECT MASTER-DATA

Contributions:

- Allow create table, insert/modify data by dynamic config
- Send notification to user when system modify data fails
- Collaborate with other team members on data constraints and accuracy

TechStack: Spring Boot, MongoDB, Kafka, ElasticSearch

PROJECT REPORT

Contributions:

- Developed backend APIs in Spring Boot to enhance business logic support for report system
- Implement Birt engine
- Connect and retrieve data from various sources (MySQL, Mongo, API, ...)
- Generate periodic or on-demand reports (which can be exported in PDF, Excel...)
- Deploy, manage and observe server

TechStack: Spring Boot, MySQL
